NFPA 497 is the standardization of the design and construction of facilities for the storage and use of flammable and combustible liquids, gases, and vapors. NFPA 497 Committee Scope NFPA 497 is used as the basis for many countries regulations in the energy, oil, gas, and chemical industries. In the US, many states have adopted the same or similar regulations from NFPA 497. For example, California Air Resources Board (CARB) adopted the NFPA 497 in 2010. The proposed NFPA 497 is for electrical equipment and for a power plant . Safety benefits The NFPA 497 standard was developed to reduce occupational fatalities, reduce facility expenses, and reduce the threat of loss of life by potentially combustible or flammable gases and vapors. The standard provides safety benefits to members of the HVACR industry. The standard also is used by regulators. Application The NFPA 497 standard is used by regulators, insurance companies, fire protection and safety service providers, and designers and manufacturers of electrical equipment. Examples of equipment using the standard are: boilers, heaters, heat exchangers, electric motor overload protection storage tank alarms and sensors transfer switches and circuit breakers liquid containment systems flame and heat detector probes and thermometers vacuum systems fuel piping electrical panel References Category:Oil and gas law

Category:Occupational safety and healthThe Toronto Raptors will have a new identity to contend with when the NBA season kicks off Wednesday. The franchise unveiled a new logo, uniform and court design at a news conference at Scotiabank Arena. Raptors general manager Masai Ujiri said there's a pride in the re-branding and noted that in past years, teams have struggled to make the leaps from conference to conference like Toronto did. As a Canadian team, Ujiri said a great deal of pride in identity goes into a team from a geographic perspective. "The identity that we're going to showcase is really going to become the identity of Canada in the NBA," Ujiri said. "That's a big statement. "In the past, I think we've struggled to make those transitions that other organizations have made." As a fan base, Ujiri said he feels the Raptors' identity over the last number of years,
